Office of Research Development

Seminar Series

About
The Office of Research Development, in collaboration with the Louis Stokes Health Sciences Library, is launching a lunch seminar series to improve project management skills for research paper writing. The seminars are intended for faculty, research staff, and graduate students.

WHERE?
Howard University Hospital
Towers Auditorium

Instructor
Young-Joo Lee, Senior Clinical Librarian

If you have any questions about the workshops or suggestions for workshop topics, please contact: young-joo.lee@howard.edu

NIH Public Access Policy
NIH Public Access Policy applies to any article rising from NIH funding. The seminar will benefit both current and future NIH grantees.
Seminar covers:

- NIH Public Access Policy
- How to comply with the policy
- How you can make non-compliant articles compliant

NIH Biosketch
NIH now requires to use the modified Biosketch format for any grant proposal submission.
Seminar covers:

- How to use My NCBI to create SciENcv
- Strategies to make your CV compelling
- To make your PubMed search efficient with My NCBI

Research Impact
How do you gauge the impact of your research? What are the tools that funding agencies use to evaluate your research? In this seminar, you will be introduced to a controversial topic, measuring research impact.
Seminar covers:

- Metrics of measuring research impact including JIF, SNIP, h-index and altmetrics
- Limitations of these metrics
- Strategies to increase research impact
